

For Further Information Contact: Questions about the proposed action and DEIS can be answered by: (Provide name, telephone number, and address of the person in the district or division who can answer questions about the proposed action and the DEIS).

Supplementary Information: The Supplementary Information should contain the remainder of the necessary information of the document. It should contain any authority citation, FEDERAL REGISTER citation to a previously published document, or CFR citation when appropriate and include a discussion of the following topics:

1. Briefly describe the proposed action.
2. Briefly describe reasonable alternatives.
3. Briefly describe the Corps' scoping process which is reasonably foreseeable for the DEIS under consideration. The description:
 - a. Shall discuss the proposed public involvement program and invite the participation of affected Federal, state and local agencies, affected Indian tribes, and other interested private organizations and parties.
 - b. Shall identify significant issues to be analyzed in depth in the DEIS.
 - c. May discuss possible assignments for input into the EIS under consideration among the lead and cooperating agencies.
 - d. Shall identify other environmental review and consultation requirements.
4. Indicate whether or not a scoping meeting will be held. Indicate time, date and location if a meeting is scheduled.
5. Provide an estimated date when the DEIS will be made available to the public. (Provide date)

NOTE

- Text to be double-spaced. Use block format.
- Place local billing code number at the top of the first page on all three copies.
- Margins—one inch on top, bottom and right side; and one and one-half inches on the left side.
- Pages must be numbered consecutively.
- Text should be typed on one side only.
- Use 8½ by 11 inch bond paper or photocopy paper.

PART 236—WATER RESOURCE POLICIES AND AUTHORITIES: CORPS OF ENGINEERS PARTICIPATION IN IMPROVEMENTS FOR ENVIRONMENTAL QUALITY

Sec.

236.1 Purpose.

236.2 Applicability.

236.3 References.

236.4 Background.

236.5 Policy and procedure.

236.6 Other agencies EQ measures.

AUTHORITY: Pub. L. 738, 74th Cong.; Pub. L. 89-72; Pub. L. 91-190.

SOURCE: 45 FR 28714, Apr. 30, 1980, unless otherwise noted.

§ 236.1 Purpose.

This regulation provides guidance for including Environmental Quality (EQ) measures in Corps of Engineers water resource development plans.

§ 236.2 Applicability.

This regulation is applicable to all OCE elements and field operating activities having Civil Works responsibilities.

§ 236.3 References.

- (a) PL 89-72
- (b) ER 1105-2-10
- (c) ER 1105-2-200

§ 236.4 Background.

(a) The role of the Corps of Engineers in the development of water and related land resources has gradually broadened over the past century. Starting with the development of navigation on the Mississippi River in 1824, the Corps role has grown to encompass, among others, flood control, beach erosion control and hurricane protection, hydroelectric power, recreation, water supply, water quality, fish and wildlife and low-flow augmentation. Laws, executive orders, and national policies promulgated in the past decade require that the quality of the environment be protected and, where possible, enhanced as the nation grows. As a result, the Federal role in EQ, including the Corps, has continued to broaden. Balancing economic and environmental interests is a major requirement to be considered in the planning of all Corps projects.

(b) Enhancement of the environment is an objective of Federal water resource programs to be considered in the planning, design, construction, and operation and maintenance of projects. Opportunities for enhancement of the environment are sought through each

of the above phases of project development. Specific considerations may include, but are not limited to, actions to preserve or enhance critical habitat for fish and wildlife; maintain or enhance water quality; improve streamflow; preservation and restoration of certain cultural resources, and the preservation or creation of wetlands.

(c) The 1105-2-200 series of Engineer Regulations describe the procedures to be followed in developing water resource plans. These procedures require the establishment of planning objectives (generally encompassing a combination of National Economic Development (NED) and EQ outputs), and evaluation of alternative plans to meet those objectives to differing degrees. With respect to the recommendation of measures for Corps implementation, ER 1105-2-200 states that, "If the selected plan or a portion thereof is not within existing Corps implementation authority, but is responsive to the planning objectives established for the study, the reporting officer may recommend Federal (Corps) participation." The ER further states that the basis for and extent of such participation is to be specified, including the precedent setting aspects of the recommendation, and further, that such recommendations are to be coordinated through DAEN-CWP before commitments are made to states or local interests. This regulation expands upon that policy and provides operational policies and criteria which will allow the field to recommend authorization for implementation of certain EQ measures.

§ 236.5 Policy and procedure.

The following policies and procedures set forth criteria to be applied in determining when EQ measures may be recommended for implementation by the Corps.

(a) *Policy*—(1) *Achievement of specified, study authority planning objectives.* Recommended plans must include measures for accomplishment of the primary purposes authorized by Congress.

(2) *Relationship of EQ measures to a Corps water resource development.* Measures proposed for EQ must enhance, preserve or restore the environment of the study area. EQ opportunities created as a result of meeting study au-

thority purposes should be pursued and, as appropriate, included in plans for Corps implementation. In addition, the recommended plan may also include separable EQ measures to meet established planning objectives. Such separable EQ measures for Corps implementation must be related to, or take advantage of, opportunities created by a water resource development to be recommended for implementation by the Corps of Engineers.

(3) *Justification.* Recommended plans must be justified on the basis that combined beneficial NED and EQ effects outweigh combined adverse NED and EQ effects.

(4) *Cost sharing.* Some features of plans required to foster EQ objectives in the Corps of Engineers program have well-defined laws or policies which establish cost sharing requirements. For instance, Pub. L. 89-72, as amended, defines cost sharing requirements for fish and wildlife enhancement. However, there are other features which may not be defined by law or policy. In those instances, cost sharing will be based on an analogy with established cost sharing policies or other similar Federal programs as described in the Catalog of Federal Domestic Assistance. Cost sharing for EQ measures for which the Corps has no standard policy will be approved by HQDA (DAEN-CWP-E, C or W), WASH DC 20314, prior to proposing cost sharing to local interests.

(b) *Procedures for approval*—(1) *Without advance OCE approval.* The reporting officer may recommend separable EQ measures that satisfy any one of the following criteria:

(i) Implemented on lands required for the water resource development;

(ii) Required to complete or more fully develop proposed EQ measures partly on lands, including mitigation lands, required for the water resource development;

(iii) More cost effective to implement or manage when directly integrated with the implementation or management of the water resource development.

(2) *With advance approval.* Other separable EQ measures may be recommended with advance approval of the Director of Civil Works through the intensive management program
